DUOMO APARTMENT

The Duomo residence is a private apartment of a family of four. They acquired the duplex and needed tailored to their needs. They love to spend time together as a family, but also want to entertain and have frequent guests. It is important to separate their private and public life. Having a big family aboard, it is important they can host them without sacrificing their independence and privacy. A study space is a must for the kids, but also both the parents want office space. The duplex is therefore separated in two individual spaces, the office/guesthouse and the main residence.

The inspiration for the design of this residential space comes from the timeless aesthetic of the Louvre Museum in Paris. The focus is neutral tones, with the color palette inspired by the paintings of Giorgio Morandi, the natural light, the crisp lines and the minimal vibes of the museum. Mimicking the layout of the Louvre, the residence is having a combination of classic and modern feeling, where the private and public spaces are separated. Big importance is paid in the alteration between big and small spaces that emphasize the bigger rooms, that represent the gallery rooms on the museum.

*Right:
Elegant Living Space
An insight into the formal living room situated on the first floor of the apartment, exuding timeless elegance and refined comfort.*

Designed with dual functionality as an office and guesthouse, this space seamlessly aligns with the overarching aesthetic of the larger apartment while incorporating a more professional touch. Neutral tones dominate the interior with subtle blue accents, creating a refined atmosphere. The layout comprises a vestibule for a welcoming entry, a living and dining area featuring an integrated office space catering to the client's work-from-home needs, a bedroom for guests' comfort, a well-appointed bathroom, and a kitchen designed to accommodate catering requirements. This thoughtful blend of style and functionality ensures a space that effortlessly transitions between work and hospitality.

Left: Apartment Insights

Detailed sections offer a comprehensive view of the layout and design intricacies within the small apartment.

Versatile Hub
A harmonious fusion of dining area and small office, creating a versatile and functional space.

Bath Retreat
A peek into the contemporary bathroom, embodying a sleek and sophisticated oasis of design and comfort.

GIO PONTI EXHIBITION

The Exhibition Loggia is a temporary exhibition dedicated to the works of the great artist GioPonti, running throughout the summer. The loggia showcases designs from his magazine Domus, as well as buildings, furniture, and ceramic objects that he created. The space has two regular and two accessible entrances and exits. In the piazza of the loggia, there is a temporary cafe bar structure directly accessible from the exit of the loggia, with bathrooms located behind it. On the right and left sides, there are two kiosks with seating areas.

The exhibition is inspired by the concept of the kaleidoscope, which represents the observation of beautiful forms and brings out a sense of lightness and joyfulness reminiscent of childhood memories. This theme is important to Ponti's work, which encourages viewers to enjoy his creations without taking them too seriously. The shape of the loggia reflects the geometry of the kaleidoscope, with the center representing Ponti's philosophy that his creations are for the viewer and reflect timelessness.

Entrance Accessibility
The exhibition entrance, fully accessible via vibrant yellow ramps, ensuring inclusivity and ease of access.

Gio Ponti, a polymath in the realm of design, transcended the role of an architect. The exhibition is a journey through his multifaceted career, encompassing his roles as an architect, designer, publisher, and mastermind behind iconic furniture and ceramics. The showcase is thoughtfully divided to illuminate the distinct facets of his remarkable contributions across various creative domains.

Right: Comprehensive Floorpla

A detailed floorplan providing a holistic overview of the spatial layout and design elements.

KEKKAN RESTAURANT

This restaurant project in the heart of Florence is a spacious establishment that needs to be able to accommodate reception, sitting areas, bar, kitchen, customer bathrooms, back room for staff, and cold and dry storage. The main challenge is to create separate entrances for customers and staff. Another crucial factor is making the entire space ADA regulated, ensuring that it is accessible for all guests. Additionally, the kitchen size must be adequate to the number of tables for efficient service. These considerations must be balanced with the overall aesthetic and design of the restaurant, creating a welcoming and comfortable environment for diners.

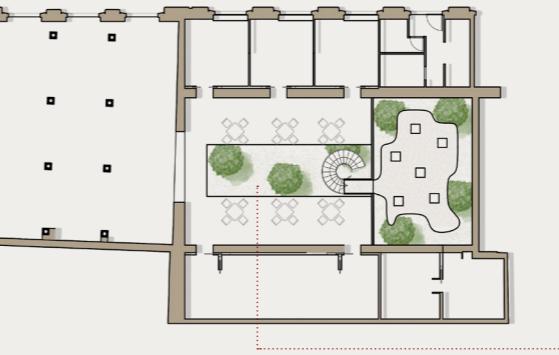

The Kekkan restaurant's concept is rooted in the Japanese art of Kintsugi, which embraces the idea that broken objects can be repaired and made useful again. This concept is reflected in the name "Kekkan," which means flaw and blood vessels. The restaurant is a blend of modernity and tradition, and it celebrates the beauty of imperfection. The space is designed to evoke a sense of tranquility, with warm lighting and natural materials like wood and stone.

ENQUIRER OFFICE

Enquirer studio is the child of a photographer/journalist who wants to offer a different approach to social issues from the point of view of documentary photography. The studio houses the journal offices and a multifunctional space, where workshops, publications and exhibitions of photographs are held. The space is divided in the working area, where employes have a kitchen and bathrooms, storage room and dark room and a relaxing area, the meeting room, the gallery, the entrance/reception with the snack bar and public bathroom. From the main entrance there is also an outdoor space.

In contrast to documentary photography the space is designed to resemble a warm hug. The concept of Hug is implemented in the design through the separation of spaces, creating smaller virtual embraces, that contain the main purpose of the room. Sharp lines for the structure, in combination with the grid of the space. To have a more direct approach to the concept, the furniture selected or customized are more round and circular shape to reflect the softness of the hug and the themes safe and comfort.

ECHO HOTEL

The ECHO Hotel is a truly unique and exclusive hotel located in Florence. As a 5+ star hotel belonging in the heritage category of hotels, it offers guests an unforgettable experience with its luxurious accommodations, exclusive amenities, and rich history. Designed exclusively for adults, the hotel features four types of rooms, including couple rooms, double rooms, duplex suites, and a penthouse suite, all of which are beautifully designed and provide the ultimate in comfort and relaxation. The hotel also offers a range of exclusive amenities, such as a wellness center, unique gastronomy and bars, retail stores, and leisure spaces, including a theater/cinema room, library, art gallery, and a botanical garden located on the top floor.

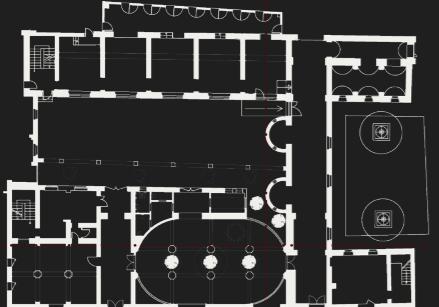

The concept of the Hotel as “the echo” represents a connection between the past, present, and future, with a focus on preserving and evolving over time. This idea acknowledges that without a connection to history, there can be no meaningful future, and that everything is part of a periodic circle. The hotel’s design reflects this concept, with themes that revolve around the natural elements of the seasons, the phases of the moon, and the passage of time.

*Right: Autumnal Double Room Vista
Inside the double rooms, enjoy a view representative of the fall season, immersing guests in a warm and inviting atmosphere.*

The Hotel's "Echo" concept embodies a connection between the past, present, and future, emphasizing the importance of preserving and evolving over time. The design reflects this through themes of seasons, moon phases, and the concept of time.

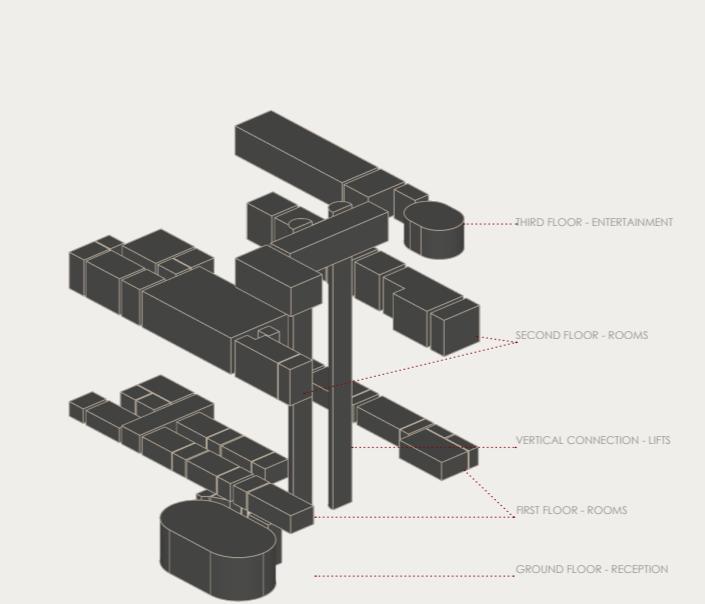

Seasonal themes influence room aesthetics, with a neutral palette inspired by specific seasons in different room types. Moon motifs and phases are incorporated throughout the hotel, symbolizing the cyclical nature of life. The design embraces the fluidity of time, featuring curvy furniture and timeless materials that bridge classic and modern styles.

HAMPTONS PROPERTY

This Southampton vacation house seamlessly blends traditional Hamptons style with modern design, creating a captivating contrast. The architectural composition features clean lines, straight edges, and varied volumes, reminiscent of the nearby sea tides. Traditional elements like wooden exteriors and decks with expansive windows offering stunning views are harmoniously integrated with modern and Mediterranean touches, such as stone floors and furniture.

Inside, meticulous attention to detail is evident, highlighted by custom Fibonacci panels that infuse a nature-inspired design. The “linear half view” concept is embodied in the boxed buildings, the strategically placed swimming pool, and wooden elements providing a sense of privacy. The main house, divided into two structures, includes guest bedrooms, open-concept living and dining areas, a kitchen that extends to an outdoor counterpart, and a modern above-ground swimming pool. The upper floors host a master bedroom, additional guest rooms, a media room, and laundry facilities, while the beach level basement offers a private gym, cinema room, and an extra guest room. With direct beach access, this Southampton retreat seamlessly combines modern luxury with the timeless charm of the Hamptons.

*Right:
Patio Paradise

the essence of the patio,
revealing the inviting
pool and jacuzzi oasis
from a captivating top
perspective.*

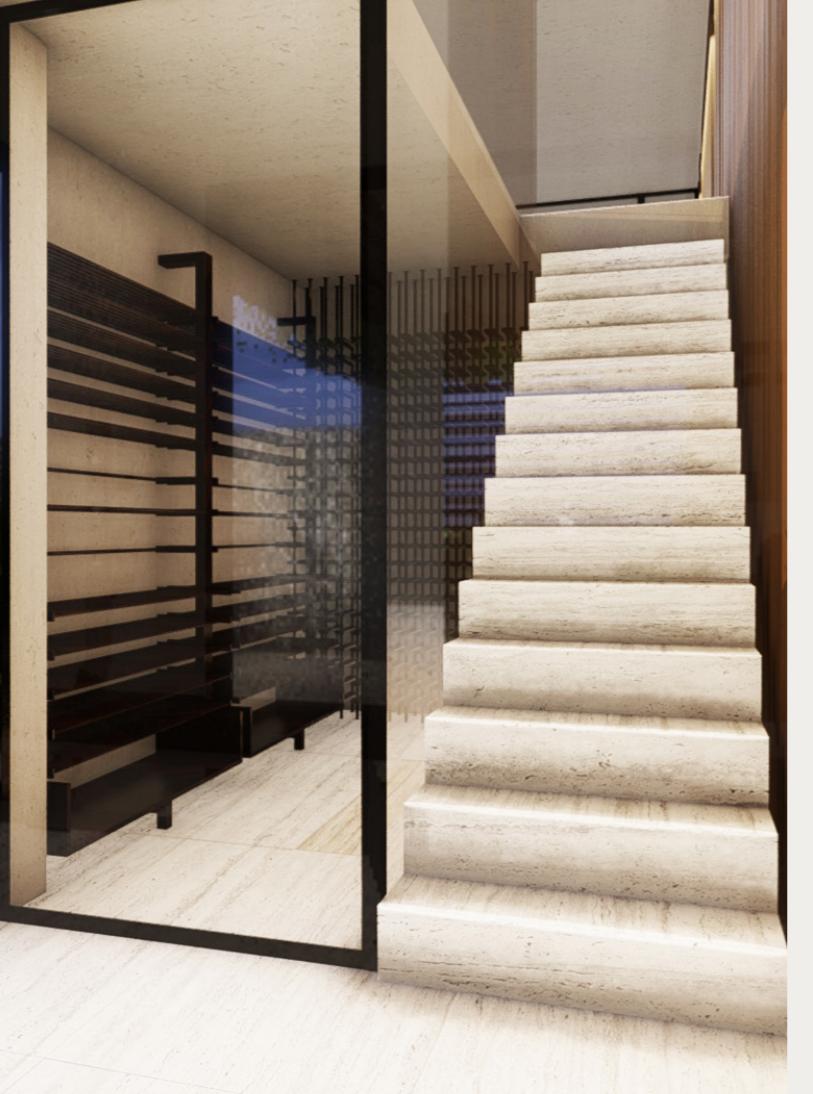

For the Hamptons property, my responsibility involved designing the flooring materials for both interior and exterior spaces, creating detailed elevations for each area, and producing renders for both the interior and exterior spaces. Additionally, I took on the design of key spaces such as the cellar, master suite, and guestrooms. This encompassing task required a meticulous selection of materials to complement the property's aesthetic, precise elevation plans to guide the construction process, and detailed renders to visualize the final outcomes. Designing specific spaces like the cellar, master suite, and guestrooms involved creating functional yet elegant layouts to meet the unique requirements of each area. The overall objective was to harmonize the interior and exterior elements, ensuring a cohesive and visually appealing design for the entire Hamptons property.

AREOS VILLA

This Athens home has five bedrooms, with private spaces in a cubicistic volume hovering above the living rooms and garden. An expansive pool leads to a field and offers a graphic contrast to the horizontal configuration of the first floor. The existing topography is embedded to create a three-dimensional experience, with different passages, walkways, and spaces throughout.

The owners sought a private sanctuary to escape everyday life. The residence was designed with neutral tones, natural materials, and calming undertones for a tranquil atmosphere. Every element reinforces the desired ambiance, making it an isolated oasis for those seeking refuge.

My role was to redo the technical plans for the changes that were made. I designed the bathrooms, formal living room, the master bedroom and the exterior entrance and staircase. Also, I was in charge for the majority of the 3D renders for the space and the RCP.

Illuminated Ascent

A captivating view of the stairs adorned with ambient lights, adding a touch of allure to the ascent. Drawing: Detail of the planter by the entrance.

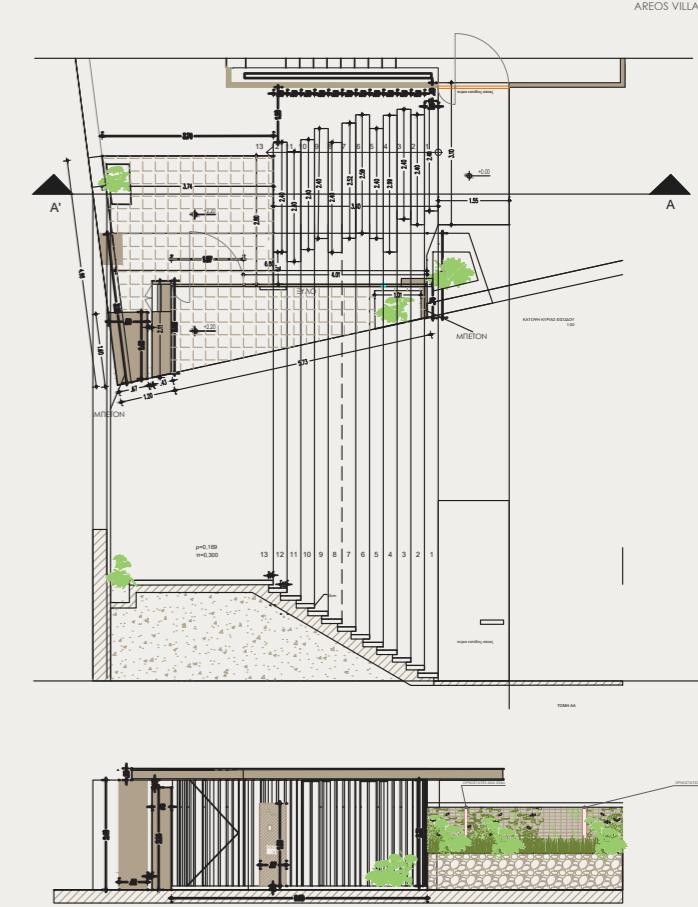

The challenge for the entrance extended beyond configuring the steps, incorporating a holistic approach that considered both functionality and aesthetics. Mindful design was applied to create a visually pleasing entrance with carefully configured steps leading down to the main door, complemented by strategically placed lights for safety and ambiance. Importantly, the landscape design was intricately woven into the overall plan, ensuring a harmonious integration of the entrance with its surroundings.

KITCHEN DESIGN

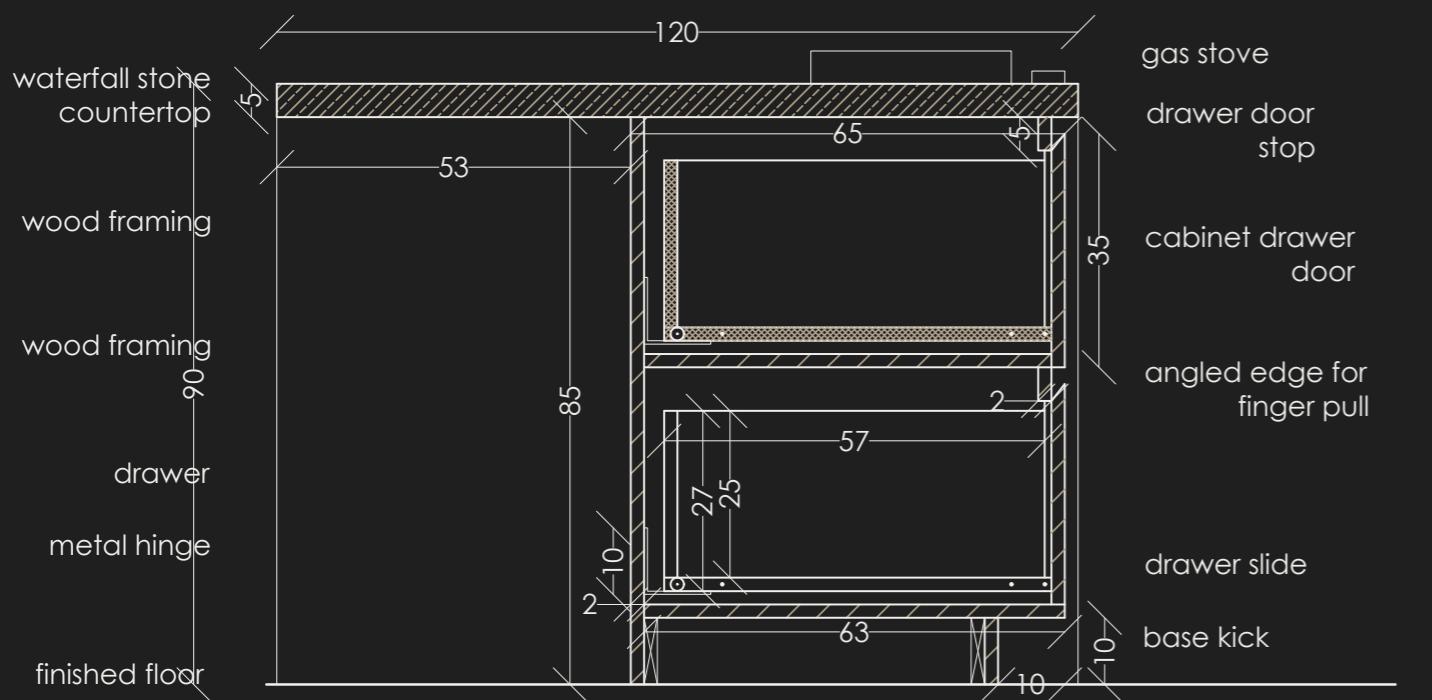

The kitchen design project features a unique concept of a female in a male world, which was reflected in the use of rough materials and straight lines, coupled with luxurious and feminine touches. The client's requirement of a professional kitchen to create new recipes was incorporated through the use of state-of-the-art appliances and equipment, while the spacious dining area was designed to accommodate large gatherings and entertainment.

The combination of rough materials such as exposed brick and metal, with softer elements such as velvet upholstery and delicate lighting fixtures, created a balanced and visually stunning space. The result is a professional yet warm and inviting kitchen that embodies the concept of a female in a male world.

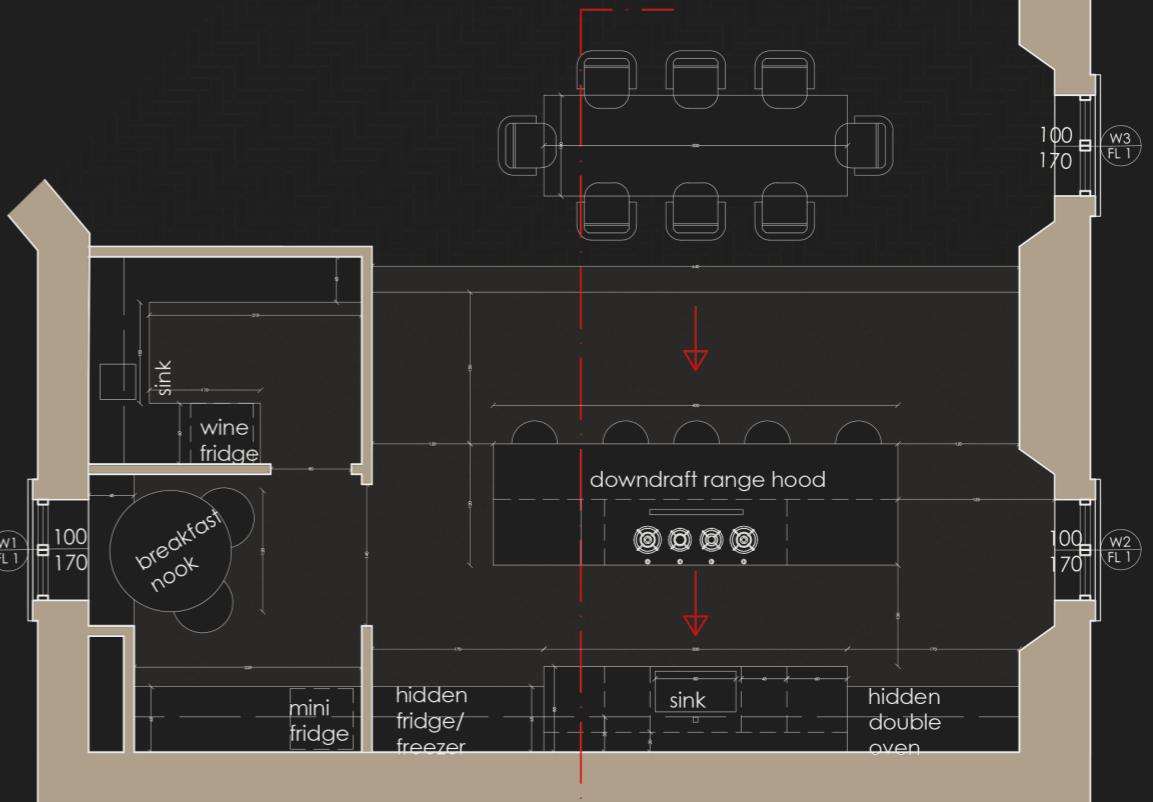

*Right:
Dining Harmony and
Culinary Haven
Presenting a view of the
dining area, harmoniously coexisting with the
main kitchen situated in
the background.*

The kitchen, designed with a chef in mind, is more spacious than conventional kitchens. It comprises a dining area for hosting events, and on a different level, the main kitchen features a custom island with a gas stove, warm oven/microwave, separate fridge and freezer, dishwasher, double oven, and a pizza oven. The kitchen nook serves as an intimate space for recipe creation and doubles as a breakfast bar with a coffee area and mini fridge. The pantry offers ample storage, counter space, cabinets, a small sink, and a wine fridge.

Revealing the kitchen, where closed cabinet doors and hidden appliances harmonize to create a sleek and sophisticated culinary space.

MAGLEV BOOKCASE

The bookcase project features an intriguing concept of opposites attracting, which is reflected in the design of the magnetic doors that can move independently in all directions. The bookcase can be designed in a modular format, available in classic wood tones or funky complimentary colors.

To further emphasize the concept of opposites attracting, the doors will be designed in different colors, creating a modern aesthetic. The handles on the doors will be in a complementary color to each door, which will enhance the visual impact of the bookcase design. The use of the magnetic system adds an element of intrigue to the bookcase, making it a unique and practical addition to any space.

The bookcase is designed with a unique locking mechanism, featuring a 2cm strip of magnetic or metallic material along its structure. This design allows the cabinet doors to securely lock in place, preventing unintended movement. The doors are equipped with powerful neodymium magnets of 1mm radius, ensuring a robust connection to the main unit. This magnetic system enables the doors to move smoothly in multiple directions – up, down, right, and left.

To achieve this, the bookcase incorporates a hidden hinge system connected to a plane that supports the rotation of the cabinet. The combination of hidden hinges and strategically placed magnets ensures a seamless and aesthetically pleasing design. This technical detail caters to individuals who appreciate modern, functional furniture design and seek creative solutions for organizing their belongings.

Left: Dynamic Bookcase Display

A captivating glimpse of the bookcase, highlighting the fluid movement, rotation, and repositioning of its magnetic doors. Drawing: The front view, and section with dimensions.

Left Image: Door Rotation Showcase

Offering a view of the dynamic door rotation, Highlighting the door rotation, this view showcases cabinets alternating between striking black and pristine white—or in the pop edition, vibrant analogous colors.

Right Image : Office Bookcase View

Providing a perspective of the bookcase within its office space setting, showcasing its seamless integration into the functional and aesthetic aspects of the room.

The innovative functionality of the bookcase involves a mechanism that facilitates the sliding and rotation of the doors. This dynamic feature allows for versatile configurations, offering a customizable storage solution. Notably, the doors have the ability to rotate 180 degrees, providing the flexibility to position them either to the left or right based on user preference.

ORIGAMI CHAIR

The dining chair project features a concept inspired by the art of origami, which resulted in a sculptural and unique design. The chair is made with 100% recycled plastic, utilizing the rotational molding manufacturing technique. The result is a chair with a timeless look that can fit into both formal and casual spaces. The design of the chair features bold geometric lines and angles, which create an interesting visual dynamic.

The use of recycled materials adds an element of sustainability to the design, making it an eco-friendly option for seeking those responsible functional and furniture. The chair is not only functional but also visually appealing, making it a striking centerpiece for any dining area.

*Right:
Origami Charm
Capturing the essence of
the origami chair within a
dining space, showcasing
its elegant design and
seamless integration, where form meets
function.*

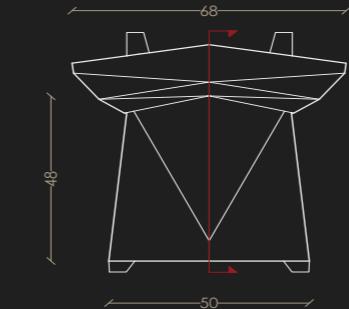

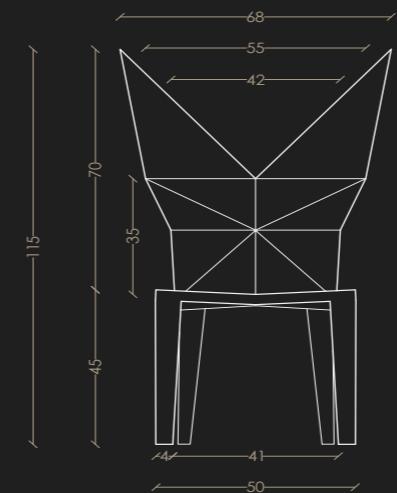

Crafted from recycled plastic, the origami chair not only champions environmental sustainability by reducing waste and lessening the carbon footprint but also brings practical advantages. Its durable nature allows it to withstand frequent use, making it an excellent choice for dining chairs. The low-maintenance quality of recycled plastic ensures easy cleaning with just a damp cloth. Additionally, its weather-resistant properties make it suitable for outdoor use, standing strong against the elements. The chair's versatility shines through as recycled plastic can be molded into various shapes, offering a range of design possibilities. Adding to its allure, the origami chair is available in a spectrum of colors, from vibrant and lively to neutral and timeless, catering to diverse tastes and styles.

Kalamari Greek French High School, Greece

PROFESSIONAL EXPERIENCE

Lead Interior Architect & Designer | Peppas Studio, Athens, Greece | 2022 - Present

- Spearheading high-end designs for diverse residential and commercial spaces, efficiently managing the creation of visually striking environments.
- Responsible for precise technical drawings and 3D visualizations to bring design concepts to life.
- Actively participated in the kitchen redesign of "Locanda Verde," a key restaurant in the Greenwich Hotel, New York City.

Interior Designer (Freelancer) | Global | 2021 - Present

- Executed a variety of residential and commercial interiors, earning commendations for professionalism and creativity.
- Proficiently managed projects within budget and tight timelines, overcoming spatial challenges to create contemporary, functional designs.

Communication Manager and Product Designer | Ecclesiastical Workshop Katsaros, Thessaloniki, Greece | 2011 - Present

- Orchestrated international offers and client communications, showcasing versatility in roles.
- Administered workshop operations and played a pivotal role in designing smaller items like reliquaries and crosses.

Private Tutor | Thessaloniki, Greece | 2011 - 2021

- Provided expert tutoring in physics, math, chemistry, and biology, achieving a high success rate in students' exams.

SKILLS

Exhibited personal paintings in two exhibitions, one of which was recognized by the famous Greek painter Tsoklis.

Technical Skills: AutoCAD, SketchUp, 3ds Max, Rhino, Dialux EVO, Adobe Suite, V-Ray, Corona, Lumion, Microsoft Office, C++, Python, Grasshopper.

Certifications: Workshop in Preservation of Historic Sites by Reuse Italy.
